

BREEZEMONT DAY CAMP, INC.

Swine Flu Information

(As recommended for summer camps by the Center for Disease Control, CDC)

- If your child has had a fever or flu like symptoms since this past Tuesday, (6/23), he/she must not be sent to camp on June 30th. In the event that this situation should arise, please call the camp office immediately. Your child should remain home until such time as your family physician indicates that he/she is no longer contagious. It will be necessary to provide us with a note from your physician indicating that it is safe for him/her to return to camp.
- Starting today, 6/24, we suggest that you take your child's temperature daily. If at any time, your child registers a temperature of 100 degrees or higher, consult your physician.
- Should your child exhibit "flu-like" symptoms with fever at camp, we will reserve the right to ask you to pick up your camper so he/she can recuperate at home.
